

# CUSTOM MOLDED HEARING PROTECTION

DECIBULLZ

PRODUCT GUIDE

# FREQUENTLY ASKED QUESTIONS

## **Q. HOW DO WE MOLD THEM?**

A. Molding Decibullz is easy. Simply heat the molds in a cup of hot water and shape them to your ears. That's it! The Decibullz earpieces can also be re-molded as many times as needed to get the Perfect fit.

## **Q. HOT WATER? IS THAT UNCOMFORTABLE?**

A. No. Decibullz uses a material that rapidly cools while retaining its pliability. Just wait 30 seconds after re-moving earpieces from the hot water. While the earpieces may feel warm, they will not be hot.

## **Q. CAN THEY BE CLEANED?**

A. They are very easy to clean. Simply use soap and cold water and rinse them off or wipe them down with an alcohol wipe.

## **Q. HOW DO WE KNOW THEY ARE ACTUALLY NRR 31 / 27 SNR?**

A. Our products have had 3rd party testing and are EPA approved.

## **Q. HOW LONG WILL THEY LAST?**

A. The molding material will last for as long as you have them. We say they last about 5 years because we've only been around for 5 years. The only thing that needs to be replaced are the foam tips which can be bought in bulk.

## **Q. WHY WOULD WE PAY MORE FOR DECIBULLZ OVER THE CHEAP FOAM EAR PLUGS THAT SEEM TO WORK FINE?**

A. You pay more for a higher end product. Decibullz stay comfortable and secure, ensuring you get the same NRR all day. The initial cost is higher than the standard foam, however you start to see cost savings after the first 4-6 months

## **Q. ARE THEY REUSABLE?**

A. YES, Decibullz are reusable. This helps cut down on a lot of waste produced by disposable ear plugs

## **Q. ARE THEY COMFORTABLE?**

A. YES, Decibullz mold to the exact shape of your ear for an all day comfortable fit.

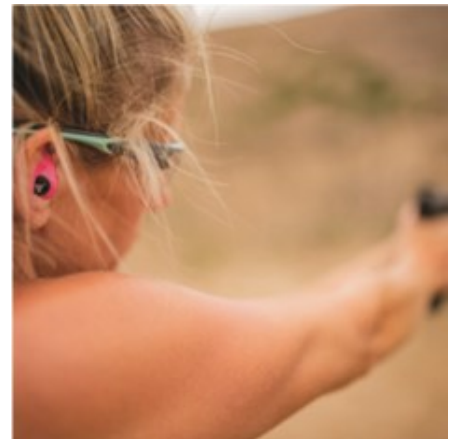

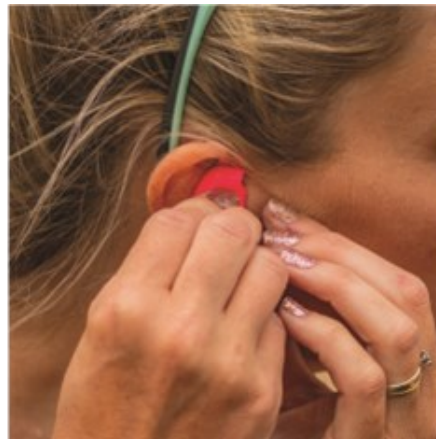

## **Q. CAN YOU RE-MOLD THEM?**

A. YES, and we are the only ones in the world you can! Unlike fixed molds, Decibullz can be re-molded as many times as needed to get the perfect fit or if your ear shape changes.

## **Q. CAN I WEAR THEM FOR WORK?**

A. YES. Our products have had 3rd party testing and are certified to EN-352, CE and ANSI standard

**DECIBULLZ - A FIT AS UNIQUE AS YOU ARE**

**HEAT:** Attach the back plug and smallest silicone tip to one of the molds and drop it into boiling water—one mold at a time. Wait 5 minutes, then safely retrieve with a metal spoon.

**SHAPE:** Allow mold to cool for 30 seconds. Then, insert into ear and gently shape to your unique contour. Leave mold in for 2 min so it retains the new form once removed.

**GO:** Once you have completed these two steps for the second mold, adjust the silicone tips as necessary, and enjoy. Re-mold as often as necessary for the perfect fit

CUSTOM MOLDED **HIGH FIDELITY FILTERS**

CUSTOM MOLDED **PROFESSIONAL HIGH FIDELITY**

The High Fidelity Earplugs have a tuned attenuation. This reduces frequencies to a safer level without distorting the sound. Perfect for concerts, events, sound sensitivity, and anyone wanting to reduce noise while still maintaining sound accuracy.

Decibullz Custom Molded Professional High Fidelity Earplugs have a tuned and flat attenuation. This reduces all frequencies by approximately the same level. Perfect for musicians, professionals, and anyone else who requires extreme sound accuracy.

- SNR value of 17dB offering mid/high Attenuation
- Suitable for music up to 102 dB
